

Team Ruby - Project - Dry Run

*** How to compile and run your code**

`jruby main.rb <crf directory location>`

This will read the files and process the program. They will be printed out to `./response` as well as the list file being written to `./listfile.txt`

*** Which CADE machine you tested your program on (this info may be useful to us if we have trouble running your program)**

This was tested on lab1-37.

We have jruby installed under the directory:

`/home/benjamin/Classes/jruby-1.7.0/bin/jruby`

type in:

`/home/benjamin/Classes/jruby-1.7.0/bin/jruby main.rb <directory of crf files>`

for example

`/home/benjamin/Classes/jruby-1.7.0/bin/jruby main.rb ./devset/input`

will produce all the correct `{num}.response` files under the directory **results**

*** Any known bugs, problems, or limitations of your program**

None right now
